The next generation of air duct access doors

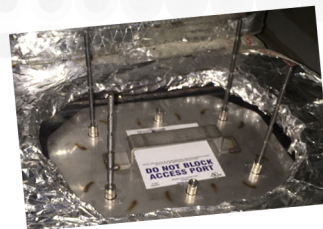

- This product is listed to applicable UL standards and requirements by UL
- Models available for commercial HVAC as well as restaurant applications
- Patented "Cam-Lock" design eliminates misplacing fastening hardware
- Made in the U.S.A. with hi-grade 11 gauge 304 stainless steel
- Easiest access door on the market to install and operate
- Exceeds NFPA specifications 2300 degree fire rating
- Available in several sizes all with lifetime warranties

Grease Duct Access Door
 MH49912
 NFPA #96

Also Available, The 9x36 Scrapper Access Door

- Same tool-less cam design as the standard Access Armor panel sizes
- New 6"x33" opening size makes this panel ideal for providing access with scraper and cleaning tools in smaller ducts

Access Armor Fire Wrap Hold Down Shield takes the hassle out of fire wrap covered access points. Attaches directly to the threaded knobs of the Access Armor Duct Access Doors and allows for perfect adjustment for different thicknesses of fire wrap. You will no longer have to re-wrap ducts each time you access the duct for inspection and cleaning.
