Defend Your Rooftop From Grease With  
**Off The Roof**  
**(ENCLOSED)**  
**Protection**  
 Stop Using Old Technology That Hides Grease Under Layers of Filters That Sit On Your Roof

The UL pending **Grease Box** is designed with the facility management in mind and is cost effective, 100% weather proof and 100% wind proof. Manufactured from 22 gauge galvanized sheet metal.

Three Styles Available To Meet Your Individual Needs;

**The Grease Box, Original**

- Designed For Moderate Volume Grease Exhaust Fans**
- 3 Tiers with one of a kind patented Polypropylene Grease absorbent pillows.
  - The 1st & 2nd Tier has the patented Even Water Flow Diverter
  - The 3rd Tier has the patented Over Flow Walls

**The Grease Box, Jr.**

- Designed For Low Volume Grease Exhaust Fans**
- 2 Tiers with one of a kind patented Polypropylene Grease absorbent pillows.
  - The 1st has the patented Even Water Flow Diverter
  - The 2nd Tier has the patented Over Flow Walls

**The Grease Box, X-Treme**

- Designed For High Volume Grease Exhaust Fans**
- 3 Tiers with one of a kind patented Polypropylene Grease absorbent pillows.
  - The 1st & 2nd Tier has the patented Even Water Flow Diverter
  - The 3rd Tier has the patented Over Flow Walls

Our Box filters use the same tried and true technology as our Fill-More Grease Booms. These highly absorbent Box Filters are manufactured using 100% recycled Hydrophobic materials and biodegradable grease neutralizers. This means that they ONLY absorb exhaust fan grease discharge, not precipitation, making them extremely effective, as well as **environmentally friendly**.
