

KLEEN- GARD

GREASE FILTERS

These commercial hood filters come in a variety of materials and styles to suit different kitchen needs. There are many commercial hood filter replacement options that are both UL listed and NFPA approved. We offer stainless steel and galvanized hood filters.

- + Stainless steel provides added durability and corrosion resistance
- + Promotes sanitation by removing grease from the air flowing through filters and draining it safely away
- + Prevents spread of range-top fires
- + Kleen-Gard is UL classified and meets requirements of NFPA Standard 96 when properly installed
- + Protects blower equipment and prolongs motor life
- + Handles up to 400 fpm (2.04 m/s)

Stainless Steel KLEEN-GARD Grease Filter with Spark Arrestor available

Spark arrestor filters are used in commercial kitchen exhaust hoods to stop airborne sparks and embers from entering your ventilation duct.

National Fire Protection Association (NFPA) fire code requires spark arrestors to be installed in any ventilation hood installed over a cooking appliance that uses solid fuel.

- + Spark Arrestor constructed of stainless steel mesh in tin-plated steel frame
- + All in one construction for ease of handling
- + Supplied with Snap-In Handles for easy installation and removal
- + Available in same sizes as baffle filters, as well as special sizes
